# CARL IVAN A. SAMPAN

## FULL-STACK DEVELOPER TRAINEE

DAVAO CITY, PHILIPPINES | 09276168478 | carlforwebdev@gmail.com | https://carl4dev.netlify.app

## OBJECTIVE

Motivated Full-Stack Developer Trainee specializing in React and Node.js with hands-on experience in developing scalable web applications. Proven ability to deliver reliable user-focused solutions while enhancing user experience through clean coding practices and collaborative approaches.

## EDUCATION

**BS COMPUTER SCIENCE** **2023-2026**

*STI DAVAO* *506 J P Laurel Ave 8000 Davao City Davao Region*

**High School Diploma** **2016 - 2022**

*Davao City National High School* *Florentino Torres Street (F. Torres Street), Davao City, Davao Region, Philippines.*

## PROJECTS

**ListaHub – Full-Stack Inventory & Business Management System** **MAY - JULY 2026**

*Full-Stack Developer* https://listahub.netlify.app/

- Developed a full-stack business management system utilized by three sari-sari stores to efficiently manage inventory, sales, and overall business operations.
- Built a responsive and intuitive interface using React, streamlining daily store workflows and improving user interaction speed by ~20%.
- Developed RESTful APIs with Node.js and Express, facilitating inventory management and transaction processing, significantly optimizing backend performance.
- Implemented a PostgreSQL database to efficiently manage products, sales, payments, and borrower information, resulting in reduced data retrieval times.
- Applied Clean Architecture principles to build a scalable, maintainable, and modular application, preparing it for future feature expansions.

**Anumata: Web-Based AI-Assisted Emotional State Pre-Evaluation System** **2026**

*Full-Stack Developer*

- Developing an AI-assisted platform enabling therapists to assess clients' emotional states through multimodal analysis of recorded psychotherapy sessions.
- Implementing speech emotion recognition (SER), facial expression recognition (FER), and posture analysis to generate emotion insights and long-term progress reports.
- Building a full-stack web application with secure multi-role access for therapists and clients, featuring interview management, patient records, and AI-generated session summaries.
- Designing RESTful APIs with Node.js and Express, along with a PostgreSQL database to manage users, interviews, reports, and clinical records.
- Integrating pre-trained machine learning models while adhering to Clean Architecture principles to ensure system scalability and maintainability.

**Veterinary Clinic Appointment System** **AUGUST - DECEMBER 2025**

*Full-Stack Developer*

- Developed a comprehensive veterinary clinic management system, featuring multi-role access for pet owners and veterinary clinics that improved service accessibility.
- Implemented an online scheduling mechanism integrated with Google Maps API, enhancing ease of access for users by

~30%.

- Designed analytics dashboards enabling clinics to efficiently manage appointment availability and treatment records, resulting in improved operational workflows.

## AWARDS & HONORS

- 2ND RUNNER UP - CODEFEST - TAGISAN NG TALINO 2024 - 25 LOCAL LEVEL COMPETITION

## SKILLS

- JavaScript; HTML; CSS; React; Node.js; Express; PostgreSQL; RESTful API Design; Git; Problem-Solving; Attention to Detail; Clean Code Principles; Laravel; Python; AI/ML

## EXPERIENCE

**FREELANCING**

*Full-Stack Developer*

- Developed and deployed production-ready web applications using React and Node.js, boosting user engagement and improving interactive experiences by ~25%.
- Designed and implemented intuitive user interfaces and navigation systems, optimizing overall user experience and leading to a 20% increase in customer satisfaction.
- Managed end-to-end deployment processes through Netlify for front-end and Render for back-end, showcasing a comprehensive full-stack development workflow.
- Collaborated effectively with clients to create tailored solutions, applying clean architecture principles that ensured scalability and maintainability of systems.
- Participated in code reviews and debugging sessions, contributing to performance optimization and adherence to coding standards.
